AIR Marine Tower

Designed exclusively for the AIR Marine*

AIR Marine Tower Kits are designed for easy installation of the AIR Marine. The tower features **built-in vibration reduction** and all **Stainless Steel Hardware**. The mast sets come in either **White Powder-Coated Aluminum** or **Stainless Steel**. Purchase both a **Mast Set** and a **Hardware Kit** for a complete tower, or just the **Hardware Kit** if you are supplying your own mast and stays.

Features:

- ◆ Mast and stays are white powder-coated aluminum.
- ◆ Mast is 9' (2.7 m) tall with an outside diameter of 1.9" (48. mm) known as 1 1/2" schedule 40 pipe, and two 9' (2.7 m) long stays with a 1" (25.4 mm) outer diameter.
- ◆ All stainless steel hardware with self-locking nuts.
- ◆ Tilting mast base for easy installation and access.
- ◆ Fully adjustable stay anchor base mounts.
- ◆ Specially designed built-in vibration dampening mounts to minimize noise transmission.
- ◆ Can be installed on transom or deck in a few hours.
- ◆ Designed to withstand hurricane force winds.

A. Saddle Clamps

B. Tilting Mast Base

C. Stay Base

MARINE TOWER KITS

	Part #	Suggested Retail Price (USD)
Tower Mounting Hardware Kit (hardware only)	TOW-HW-KIT	\$169.00
Powder-Coated Aluminum Mast Set (poles only)	TOW-POLE-AL	\$179.00

*Note: Turbine not included

ACCESSORIES

	Suggested Retail Price (USD)	
 Stop Switch	\$17.00	Allows you to "stop" the turbine. Rated at 50 amps D.C. for both 12v and 24v.
 Circuit Breaker	\$24.00	Required with any electrical installation. 12v = 50 amps D.C. 24v = 30 amps D.C.
 Amp Meter	\$25.00	Watch your output! Measures 0-30 amps for both 12v and 24v. Easy to install.

We offer these accessories to complement your AIR Marine. They are usually difficult to find because of their high D.C. ratings.
